- ✓ Suitable for roof windows
- ✓ Suitable for atypical window shapes
- ✓ A wide catalogue of colours and structures of the material
- ✓ Profiles in any RAL colour and wood-like

The Vegas Plisse roller blind is an interior roller blind allowing you to easily control the amount of natural light and heat entering a room. It will cover any part of the **window** from above or below.

The Plisse DUO version uses two different, independently operated cloths. Such design makes it possible to choose a lighter fabric of any aesthetics while at the same time using a heavily shading fabric.

Advanced mechanisms that can be applied to the roller blind **improve its rigidity on larger windows**, magnetically close the cloth in the open position and allow the Vegas Plisse to be installed on windows with unusual shapes, such as round or triangular ones.
